Unit of measure	Traffic Trip	Traffic Trip	Non-Residential Square Foot	Acre
Cost Per Unit	\$85.00	\$1,696.00	\$1.12	\$1,085.00

FINAL FEES

Final fees are the same as preliminary fees except no additional escrow monies are necessary if the escrow has a positive balance. These fees are due upon submission of final maps to be signed by our Town Engineer and Planning Chairperson. There are no final fees for a lot line adjustment.

NOTE: Escrow fees are used to pay for engineering/consultant costs, advertising costs and notification costs. Any escrow money not expended will be returned to the applicant. A positive balance must be maintained in the applicant's escrow account at all times. Failure to maintain a positive balance will delay further Board action. The Building Department maintains all escrow accounts.

RECREATION FEES

There will be a fee of \$1,363 per residential building lot due upon submission of each building permit (commercial building is based on square footage).

GEIS Mitigation Fee Calculation

The required developer mitigation fee will be calculated by the Town as set forth in the Findings Statement of the Town-wide GEIS based upon the developer plan submission. The Town has established the following parameters to assist in this process:

GEIS Preparation Mitigation Fee: The Mitigation Fee for preparing the GEIS will be calculated based on the proposed Trips multiplied by \$85. One half (1/2) will be due at the time a building permit is issued for commercial, industrial and other non-residential uses with the remainder due at the time the certificate of occupancy or compliance is issued. For residential uses one half (1/2) of the GEIS Mitigation Fee will be due at the time each individual building permit is issued with the remainder due at the time the certificate of occupancy is issued.

GEIS Mitigation Fees collected will be accounted for in a designated account and shall only be used to offset the costs of the preparation of the Town-wide GEIS or future supplementals/updates of the Town-wide GEIS.

Open Space Mitigation Fee: The Open Space Mitigation Fee will be calculated based on the proposed number of acres of disturbed developable land (clearing and grading limits) multiplied by \$1,085. One half (1/2) will be due at the time a building permit is issued for commercial, industrial and other non-residential uses with the remainder due at the time the certificate of occupancy or compliance is issued. For residential uses one half (1/2) of the Open Space Mitigation Fee will be due at the time each individual building permit is issued with the remainder due at the time the certificate of occupancy issued.

Open Space Mitigation Fees collected will be accounted for in a designated account and shall only be used by the Town to acquire, develop, provide access, preserve and protect open spaces, agricultural lands, water resources, trails, plant and wild life habitat, scenic views and vistas located within the Town.

Commercial Recreation Mitigation Fee: The Commercial Recreation Mitigation Fee will be calculated based on the proposed square footage of non-residential development multiplied by \$1.12. One half (1/2) will be due at the time a building permit is issued for commercial uses with the remainder due at time certificate of occupancy or compliance is issued.

The purpose of the Commercial Recreation Mitigation Fees is to provide and enhance recreational resources within the Town as set forth in the Town-wide GEIS.

Commercial Recreation Mitigation Fees collected by the Town will be accounted for in a designated account and shall only be used by the Town for the enhancement of recreational resources.

Traffic Mitigation Fee: The Traffic Mitigation Fee will be calculated based on the proposed number of PM Peak Hour traffic Trips multiplied by \$1,696. One half (1/2) of the traffic mitigation fees will be due at the time a building permit is issued for commercial, industrial and other non-residential uses with the remainder due at the time the certificate of occupancy or compliance is issued. For residential uses one half (1/2) of the Traffic Mitigation Fee will be due at the time each individual building permit is issued with the remainder due at the time the certificate of occupancy is issued.

Traffic Mitigation Fees collected will be accounted for in a designated account and shall only be used by the Town to improve traffic infrastructure as identified in the Town-wide GEIS.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
