An Event to Promote Career Pathways From CDL Licensure

The American Trucking Association estimates that by 2028 we will need 160,000 additional drivers nation-wide. The future of the industry depends upon attracting and retaining new drivers to this growing career field and obtaining either Class A and Class B CDL licensure is very achievable.

Learn more about a career as a CDL driver and watch local, professional drivers show off their skills in the first tri-county Truck Rodeo.
